

Cod: 3410075

Stainless steel table on legs depth 600 mm 1500x600 mm

Description

Shoeshine machine

The shoe shine machine is an automatic machine useful for polishing the toe and surface of shoes, especially leather shoes or shoes with reflective surfaces. They are equipped with a sensor that detects the presence of the shoes inside the machine and with rolling spatulas that remove dust and dirt deposited on the shoes before polishing.

How to shine shoes

The shoe polishing machine is equipped with two interchangeable heads, a light one for light shoes and a black one for dark shoes. The shine heads can be cleaned under running water and allowed to dry after use to ensure that they always remain as polished as possible.

The shoe shiner is small in size and portable. It can be placed in any room, at the entrance of the hotel or in specific positions to allow your customers to get ready.

Shoeshine machine on Ristoattrezzature

All shoe shining machines in our catalogue are CE-marked.
