

Cod: 1401

Single-phase activated carbon air capacity 3000 m3/h

Description

Plant for the deodorisation and filtration of organic substances consisting of a double-intake centrifugal fan with single-phase motor directly coupled to the impeller, 75% separation degree and activated charcoal filter deodorisation efficiency over 90%.

Dimensions

Dimensioni esterne	1200x670x670 mm
--------------------	-----------------

Technical data

Alimentazione	Electric
---------------	----------

Peso	120 kg
Portata aspirazione oraria	3000 m ³ /h
Potenza Elettrica	0.55 kW
